

Dermagiq® Lipcare

Dermagiq® Lipcare consists entirely of vegetable oils and fats. The antioxidants from the honey, castor oil, vitamin E and beta-carotene in Dermagiq® Lipcare help protect against external influences such as UV light. The fats and oils from candelilla wax, shea butter and palm wax protect the lips from dehydration and help retain moisture. The active ingredients from the honey and calendula have a soothing and calming effect on rough, chapped and blistered lips. The soothing and nourishing effect of Dermagiq® Lipcare makes it ideal for every-day lip care purposes. Dermagiq® Lipcare has a slight taste of honey and contains only botanical ingredients.

How to use Dermagiq® Lipcare

Rub the stick over the lips gently; use as often as necessary.
