

deconex® 64 NEUTRADRY

**Neutral rinsing and drying aid,
biocompatible**

For reprocessing medical instruments and utensils
in washer-disinfectors (WD)

Application

deconex 64 NEUTRADRY is used as a rinsing and drying aid in washing machines for medical instruments and utensils. It is dosed into the final rinsing water, which usually is also used for thermal disinfection (80-93 °C).

Properties

deconex 64 NEUTRADRY

- lowers the surface tension of water
- shortens the drying time by up to 50%
- is biocompatible and correspondingly certified
- is pH-neutral
- has a slightly lubricating effect (on joints)

Ingredients

Surfactants, organic acids, preservative

Dosage

0.3-1.0 ml/l (depending on the water quality)

Information on use

Deionized water should always be used for thermal disinfection/final rinsing.

Material compatibility

The product features a broad material compatibility. However, the following has to be considered:

Accessories for anaesthetic utensils made from polysulphone (PSU) as well as from polyphenyl sulphone (PPSU) such as connectors for larynx masks, valves, adaptors and parts of instrument container covers might form production-related stress cracks in the event of contact with rinse aids. These parts must be tested first for suitability.

Chemical/physical data

pH	1% solution in demineralized water	approx. 7.9
Density	concentrate	1.0 g/ml
Appearance	concentrate	transparent, colourless to yellowish liquid

deconex® 64 NEUTRADRY

Availability

Please ask your local representative about current container sizes.

Containers, screw caps and labels are made of recyclable polyethylene.

Additional information

For information concerning safety at work, storage and waste disposal/effluent, please consult the corresponding safety data sheet.

Take advantage of our vast know-how! Please, contact us for further information regarding your specific application.
